                              C7
well huggy looked at pushy and pushy looked at huggy
and they circled slowly around
Em
huggy saw the dirt and knew that pushy was hurt
and then he saw her big bad frown
D7
goodness me and heavens above
                                         G7 C C# D
                      D7
I think I know what you need said huggy the tug
                                         C7
              Em
sure enough he
                motored over there right by her side
and gave her a playful nugde
everybody gasped and ran to hide
and pushy the tug did not budge
     D7
then suddenly she smiled and the light shined out
                                                  C C# D
it was a brand new feeling of love for pushy the tug
    G7
                              C7
now lately in the harbor there is
                               much work to do
   G7
but now there's helpers around
C7
pushy has huggy and huggy has pushy
and they toot a tune of happy sounds
D7
once you spread that love around and you're bit by that bug
you'll feel like they do huggy and pushy the tug
          D
                    G
